# Western Lifts

## XLA

Semi Hydraulic  
Single Post

## XLH

Full Hydraulic  
Single Post

### Frame Engaging Swivel Arm Inground Lift

Traditional inground hydraulic lifts are the most popular and economical method used worldwide to service vehicles. These models are the most versatile lifts available today. They can be installed with confidence and used for decades to provide trouble free service. For a clean, space-saving and obstruction-free repair facility, inground lifts are the choice of smart service professionals.

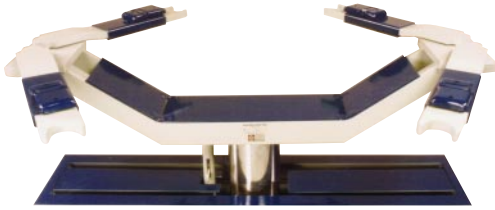

**Quality!**  
**Reliability!**  
**Value!**

- **Only One Basic Moving Part**  
Provides years of trouble-free service
- **3 1/2" Low-Profile Steel Arms**  
Gives maximum drive-over clearance
- **Automatic Safety Locks**  
Lift locks in 8 positions
- **Lift Can Be Specialized**  
See back for details
- **Exempt from UST Regulations**  
Eliminates concern about EPA compliance
- **Space Saving Lift**  
Utilizes shop space efficiently
- **Fiberglass Protection**  
Safeguards against corrosion
- **3 Position Height Adapters**  
Great for imports & SUV's

EASY CONTROL OR SEMI-HYDRAULIC FOR BEST VALUE**

# XLA/XLH OPTIONAL CONFIGURATIONS

**WYA/WYH**

• Recessed Wide-Yoke provides the undercar accessibility of a two-post lift with the economy of a single post lift! Bolster recesses into slotted floor box for an obstruction-free shop floor.

**WYCA/WYCH**

• Recessed Wide-Yoke Cushion Pad provides the fastest method to raise a vehicle. Drive-over pads are only 1 1/2" off the floor. Ideal lift for fast tire service. Adjustable width sliding cushion pad model available also.

**HDA/HDH**

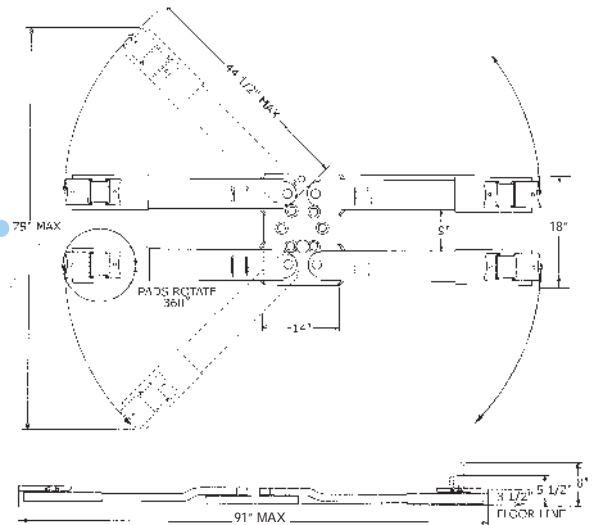

• Traditional "H" frame adjustable lift offers flexibility to lift almost any type of vehicle. Excellent lift for pressure washing and fast preventative undercarriage maintenance.
